1/4 Oz.

MirrOdine[®] XL and MirrOdine[®] Suspending Twitchbaits

The very popular MirrOdine[®] now has an extra large brother, the NEW MirrOdine[®] XL. This new larger size, casts further, while still maintaining the same sink rate as its little brother. Both lures feature a wide body profile and realistic baitfish pattern which produces violent strikes. MirrOdine[®] and the NEW MirrOdine[®] XL, feature a bright, reflective, luminescent insert, “fish calling” rattles and natural 3-D eyes to enhance their realism, plus extra strong hooks. With a twitching retrieve, these shallow runners dart from side-to-side, mimicking a wounded baitfish. Trout, Redfish, Snook, Striped Bass and Tarpon find the MirrOdine[®] and the MirrOdine[®] XL to be irresistible.

Surface Walker

ORIGINAL **MirrOlure**[®]
LUMINESCENCE SERIES™

MirrOmullet[®] Surface Walker

MirrOmullet[®] closely resembles a juvenile finger mullet, a favorite forage for all coastal predators. This surface walker features a wounded mullet action and subtle presentation which is ideal for fishing the calm shallows. MirrOmullet[®] features a luminescent insert for increased flash, 3-D eyes and natural mullet profile.

Suspending Twitchbait

ORIGINAL **MirrOlure**[®]
LUMINESCENCE SERIES™

MirrOminnow[®] Suspending Twitchbait

Designed to mimic a Glass Minnow or Rain Minnow, a favorite natural baitfish for cruising coastal predators. MirrOminnow's bright, reflective, luminescent insert and slender body shape are unmatched in realism.
